

Cool Boss Technical Service Bulletin Installation and Operation Manual Update

BendPak TSB 120-052023

The purpose of this Technical Service Bulletin is to describe updates to the following two documents.

- Cool Boss Installation & Operation Manual 5900274 Rev. A3, Models CB-12, CB-14, CB-26
- Cool Boss Installation & Operation Manual 5900271 Rev. A5, Models CB-16, CB-28, CB-36.

Soon to be available revisions to these manuals will incorporate the data described here. You can always find the most up to date version of the Cool Boss Manual on the web at coolboss.com/downloads

The following provides information regarding a **new airflow upgrade** to our Cool Boss evaporative fans. Recently, our engineers optimized the shape and angle of the blades, resulting in increased airflow without compromising sound levels. With this upgrade, our fans will provide an unparalleled level of cooling performance, making them ideal for use in any environment.

The new airflow specs are noted in **BOLD**; to the right of the Existing Specs. Although new manuals are currently in development, please update your respective Cool Boss manuals by adding the data below until new manuals become available.

5900274, Rev. A3, page 6 & page 8.

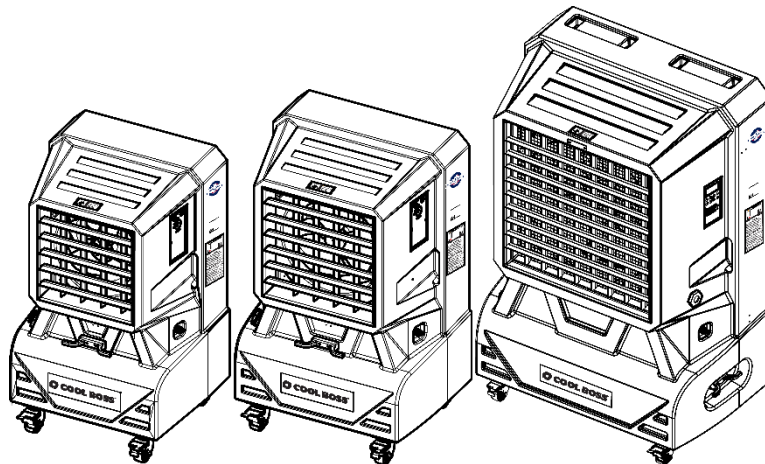

– **Replace** the following Max. Airflow (CFM) and Cooling Area (sq. ft.) data.

COOLBREEZE Swing Louver Models (Cool Boss Spec. Change)
