Portable Cool Boss™ Air Cooler Perfect for the Shop or Backyard

One of our most popular selling units, the CB-24 is the perfect balance between size and cold air delivery. Hanging out in the backyard with friends and family? Maybe you're planning an outdoor event during the hot and dry summer months. Whatever your air conditioning needs are, the Cool Boss CB-24 is sure to help make your friends, family, and guests feel a lot more comfortable.

The CB-24 is small enough to save valuable floor space, but still large enough to deliver some seriously cold air. Use it in the shop or garage to keep you and your workers happy and more productive, all the while saving money compared to other air conditioning options. Auto repair work is hard enough when the air around you is comfortable, but when the temperature climbs, it's hard to concentrate and stay productive. Not to mention OSHA law requires workplaces to be free of heat exposure risks. With a Cool Boss you can keep your employees happy and healthy. Cool Boss evaporative air coolers are the perfect solution for any vehicle repair operation or home garage; and much better than fans that simply recirculate hot stuffy air around the room. The CB-24 will help reduce heat from climbing weather temps, hot-running welders and machinery, and create a cool working environment. Roll it around the shop as you move between bays and other workspaces.

Features

- Oscillating auto-swing louvers
- Blue Flex™ axial-flow fan
- 19-gallon reservoir
- Remote control with a convenient holder
- Automatic water source shutoff
- Honeycool™ evaporative media
- 3-speed fan
- Space-saving design
- GFCI plug
- UL® certified
- Water inlet flow control

Specifications
